SUMMARY

Fullstack Engineer and Solopreneur with 2+ years of experience delivering enterprise IAM systems, automation tools, and fullstack SaaS products. Proven ability to architect and deploy production-grade systems using JavaScript, Node.js, React, and modern DevOps workflows. Currently leading a 4-member engineering team at PC Solutions. Skilled in building scalable applications, integrating identity systems, and leading projects from concept to deployment.

EXPERIENCE

PC Solutions

May 2025 – Present

Software Engineer

New Delhi, India

- Leading and mentoring a team of 4 engineers in designing, developing, and deploying enterprise-grade Identity and Access Management (IAM) systems, with a focus on security and scalability.
- Architected and implemented an end-to-end HRMS to Active Directory automation system for Sun Pharma, managing over 50,000+ user accounts and provisioning workflows using Node.js, LDAPjs, Docker, and Azure Linux VMs.
- Developed an enterprise-level Self-Service Password Reset (SSPR) platform for Pramerica Life Insurance, empowering 3,000+ employees to securely manage credentials, reducing IT support dependency by 40%.
- Currently building a multi-directory hybrid SSPR platform — a next-gen alternative to Zoho's ManageEngine — integrating Active Directory, Entra ID, and Google Cloud Directory with robust MFA flows.
- Established DevOps pipelines and CI/CD workflows using Docker, Nginx, and Azure VMs to ensure zero-downtime deployment and fast rollback mechanisms.
- Collaborated with enterprise clients, translating business requirements into scalable backend architectures, ensuring compliance with corporate security standards.

PizeonFly Pvt. Ltd.

Jan 2024 – May 2025

Fullstack Developer & Team Lead

New Delhi, India

- Led a team of 4 developers, overseeing the architecture, design, and implementation of multiple B2B solutions and SaaS products from concept to deployment.
- Engineered and launched Allmytab.com, a productivity browser kit enabling users to create custom dashboards and integrate third-party APIs for personalization.
- Orchestrated the development of HisaabKaro.com, a personal accounting and expense management tool featuring intuitive UI/UX and cloud storage support.
- Built automated data extraction tools including LinkedIn and Google web scrapers, enabling B2B clients to collect market insights efficiently.
- Developed white-label CRMs for finance and HR clients, implementing modular, scalable architectures to support multi-tenant use.
- Integrated best coding practices across projects, achieving optimized performance and maintainability across systems.

PizeonFly Pvt. Ltd.

Nov 2023 – Dec 2023

Web Developer Intern

New Delhi, India

- Delivered tailored web solutions to clients, collaborating closely with product teams to meet launch deadlines.
- Optimized web performance, achieving 50% faster page load times for several client applications.
- Contributed to foundational internal tools, writing modular code for long-term scalability.

PROJECTS

Repurpose <i>AI, React, Node.js, PostgreSQL, Redis, BullMQ</i>	repurpose.nouvous.com
<ul style="list-style-type: none">– AI-driven platform that turns raw content into short-form social media videos.– Developed backend workflows for automated video generation and cross-platform posting.	
FullCleaner <i>Python, React, Node.js, PostgreSQL, PayPal API</i>	cleaner.nouvous.com
<ul style="list-style-type: none">– PC cleaning and antivirus software with cloud-based license management dashboard.– Built using Python for system utilities and MERN stack for license control panel.	
SuperDark <i>Kotlin, Jetpack Compose, Android</i>	Play Store
<ul style="list-style-type: none">– Android app that allows screen dimming beyond system limits for low-light comfort.– Built using Kotlin and Jetpack Compose with 100+ MAU.	

EDUCATION

Indira Gandhi National Open University (IGNOU)	2023 – Present
<i>Bachelor of Computer Applications</i>	<i>New Delhi, India</i>
K.G.S.B.V (CBSE)	2021 – 2022
<i>12th Grade</i>	<i>New Delhi, India</i>

TECHNICAL SKILLS

Frontend: React, Next.js, Redux, React Native, Tailwind, JoyUI, AntD, MUI, Shadcn, Bootstrap
Backend DB: Node.js, Zustand, Redux, Express, REST APIs, GraphQL, Redis, BullMQ, MongoDB, MySQL, PostgreSQL, Elastic search, Kafka, Firebase, JWT, Zod
DevOps Infra: Git, Docker, AWS EC2, Azure VM, Nginx, Linux, Azure Blob Storage, Ngrok, LDAPjs, Entra ID / Microsoft AD
AI Tools: Generative AI, Gemini
Languages: JavaScript, TypeScript, Python, Kotlin, SQL
